

ARTHRITIS

1. Nearly 1 in 3 adults in the United States have arthritis or chronic joint pain.
2. Arthritis is the nation's leading cause of disability among Americans over 15 years of age.
3. Arthritis is a general term to describe the inflammation of joints which often indicates a degeneration of the tissue.
4. There is no known cure for arthritis.

ARTHRITIS AND PH BALANCE

While there are many causes for arthritis, high acidity in the blood may cause the cartilage in the joints to dissolve. When this joint degeneration occurs, the joints lose their normal, smooth sliding motion causing the bones to rub together, and the joints to become inflamed causing pain.

Generally speaking, high acid levels within the body prevent the body from functioning properly. When your body is too acidic, it becomes increasingly difficult for the body's cells to absorb the nutrition that the cells need. High acidic levels assist in causing the immune system to malfunction creating an environment for joint and soft tissue degeneration to thrive. In addition, acids contribute to bone loss. The longer you wait to reduce your body's acidity, the longer you will remain at risk for arthritis and related illnesses.

Fortunately, a significant reduction in the body's acidic level contributes to the regeneration of healthy cells and tissues. Alkaline **Tyent Water™** provides a healthy foundation for helping to decrease acidic levels within the body. The negative charge of the **Tyent Water™** may help to soothe the inflammation in the joints by neutralizing the acid content in the blood and result in greater mobility and a reduction in pain. Incorporating **Tyent Water™** into your daily routine may help reverse the damage caused by acidity and arthritis and become the positive step forward that you need to help improve your health!

TAKE THE SHORTEST PATH TOWARD HEALTH AND LONGEVITY

Prevention is the key. Most people don't fully appreciate their health until they lose it. As said by Dr. Alvin Stein MD, FACS, *"Acidosis is the only true disease and everything that makes us sick is simply a by-product of acidosis."*

If you are healthy now, then drink alkaline **Tyent Water™** to help stay healthy through prevention. However, if your health is currently less than perfect, then take one of the shortest paths to recovery by drinking alkaline **Tyent Water™**.

It's a pretty simple decision. Save thousands of dollars on bottled water and improve your health at the same time. Drinking alkaline **Tyent Water™** is the single most productive thing you can do for your health.

Tyent USA will help you embrace the future of healing and prevention.

Yes, there is a better road to achieve the benefits that you need for a healthier lifestyle. Call **Tyent USA** today...and get on the road to better health now!
