

HIGH BLOOD PRESSURE

High blood pressure, also known as hypertension, is a medical disorder where the majority of people have no symptoms. Over 50 million Americans have high blood pressure. It has been termed "the silent killer" because many people who are suffering from high blood pressure do not know they have it. The danger lies in several areas, including a lack of oxygen to your body's cells, which may contribute to long term damage to the heart, blood vessels and kidneys.

Here's an interesting fact...doctors know that if you take several deep breaths right before the blood pressure measurement, you can get a lower reading. By doing this exercise, you have temporarily elevated the pH of the blood by breathing out more CO₂ and by breathing in more O₂. If you can lower your blood pressure by using this trick, your high blood pressure may be caused by a lack of oxygen. Again, **Tyent Water™** is abundant in oxygen, and this oxygen rich water gives you energy because of its rapid absorption into your body's cells.

Although there are numerous causes, Atherosclerosis is another toxic condition that can contribute to high blood pressure. Atherosclerosis is a condition in which fatty material collects along the walls of the arteries. This collection of fatty material causes a toxic environment within the body that thickens, hardens (*forms calcium deposits*), and may eventually block the arteries.

In addition to being abundant in oxygen, **Tyent Water™** helps to detoxify the body by neutralizing free radicals. The neutralization of free radicals helps contribute to a healthy cell environment, as opposed to a toxic environment. Incorporating **Tyent Water™** into your diet can play a valuable part in your health.

TAKE THE SHORTEST PATH TOWARD HEALTH AND LONGEVITY

Prevention is the key. Most people don't fully appreciate their health until they lose it. As said by Dr. Alvin Stein MD, FACS, "*Acidosis is the only true disease and everything that makes us sick is simply a by-product of acidosis.*"

If you are healthy now, then drink alkaline **Tyent Water™** to help stay healthy through prevention. However, if your health is currently less than perfect, then take one of the shortest paths to recovery by drinking alkaline **Tyent Water™**.

It's a pretty simple decision. Save thousands of dollars on bottled water and improve your health at the same time. Drinking alkaline **Tyent Water™** is the single most productive thing you can do for your health.

Tyent USA will help you embrace the future of healing and prevention.

Yes, there is a better road to achieve the benefits that you need for a healthier lifestyle. Call **Tyent USA** today...and get on the road to better health now!
