

HEART DISEASE

The heart is the center of the cardiovascular system. Through the body's blood vessels, the heart pumps blood to all of the body's cells. The blood carries oxygen, and our body needs this steady supply of oxygen-rich blood to keep it working right. **Tyent Water™** is chock full of oxygen, and the heart muscle requires oxygen and nutrients in order to do its job. When there isn't enough oxygen, the muscle starts to suffer. When there is no oxygen, the muscle starts to die.

Our everyday habits that may contribute to heart disease are smoking, having high blood pressure, eating fatty foods, drinking dead water, being overweight, and not exercising. In other words...clogging our arteries and starving our blood of oxygen.

Here's an interesting fact...doctors know that if you take several deep breaths right before the blood pressure measurement, you can get a lower reading. By doing this exercise, you have temporarily elevated the pH of the blood by breathing out more CO₂ and by breathing in more O₂. If you can lower your blood pressure by using this trick, your high blood pressure may be caused by lack of oxygen. Again, **Tyent Water™** is abundant in oxygen.

While **Tyent Water™** is abundant in oxygen, **Tyent Water™** also has a high PH for drinking that is pertinent in healthy heart function. There are several possible explanations for this phenomenon. For example, when the blood is at a higher PH and contains excess oxygen, the viscosity of the blood is lower so that the heart may not have to pump as hard.

In addition, **Tyent Water™** contains calcium ions. Calcium ions may help assist in dissolving plaque and cholesterol build-up in the artery walls, thus opening up artery passages. Read on to learn more about the many benefits of **Tyent Water™**

TAKE
THE SHORTEST
PATH TOWARD
HEALTH AND LONGEVITY

Prevention is the key. Most people don't fully appreciate their health until they lose it. As said by Dr. Alvin Stein MD, FACS, *"Acidosis is the only true disease and everything that makes us sick is simply a by-product of acidosis."*

If you are healthy now, then drink alkaline **Tyent Water™** to help stay healthy through prevention. However, if your health is currently less than perfect, then take one of the shortest paths to recovery by drinking alkaline **Tyent Water™**.

It's a pretty simple decision. Save thousands of dollars on bottled water and improve your health at the same time. Drinking alkaline **Tyent Water™** is the single most productive thing you can do for your health.

Tyent USA will help you embrace the future of healing and prevention.

Yes, there is a better road to achieve the benefits that you need for a healthier lifestyle. Call **Tyent USA** today...and get on the road to better health now!
